Portfolio

Professional Summary

Innovative Computer Science student and published researcher with expertise in deploying full-stack web applications and end-to-end machine learning systems. Demonstrated success in building AI-powered mobile applications, authoring peer-reviewed conference papers, and developing high-performance commercial websites using modern frameworks like Next.js and Laravel. Combines strong theoretical knowledge with practical software engineering skills to deliver impactful solutions.

Education

Bachelor of Science in Computer Science and Engineering **Jan 2022 – Dec 2025**
East West University, Dhaka
CGPA: 3.46 / 4.00

Higher Secondary Certificate (HSC), Science **2020**
Chattogram Cantonment Public College
GPA: 5.00 / 5.00

Secondary School Certificate (SSC), Science **2018**
JB High School, Chattogram
GPA: 5.00 / 5.00

Professional Experience

Full Stack Software Engineer | CeylonZtudio **Oct 2025 – Present**
Dhaka, Bangladesh

- Designed and developed a full-featured web-based HR Management System (ceylonztudio.com) to streamline employee management, attendance tracking, and organizational workflows.
- Built the backend using Laravel and SQL, implementing secure authentication, role-based access control, and optimized database architecture for scalable performance.
- Developed responsive and interactive frontend interfaces using JavaScript, Tailwind CSS, Vanilla JavaScript, and Alpine.js, improving usability and system responsiveness.
- Integrated end-to-end system functionalities including employee records, HR analytics, and automated data handling, reducing manual HR operations significantly.
- Deployed and maintained the production system on Hostinger, ensuring reliable hosting, performance optimization, and continuous system monitoring.

Telesales Representative | AyyKori Digital Limited **Aug 2024 – Nov 2024**
Dhaka, Bangladesh

- Surpassed quarterly sales targets by 22% through data-informed sales techniques and persistent client relationship management, contributing $18K in total revenue.
- Achieved a 96% client satisfaction score by providing expert technical consultation and troubleshooting for digital software products.
- Analyzed call log data to identify successful conversation patterns, which were used to train 4 new team members, improving the team's overall conversion rate by 15%.

Technical Projects

Shohochor - AI Navigation for the Visually Impaired React Native, YOLO, Hugging Face, Expo

- Led the development of a mobile application that uses real-time object detection to assist visually impaired users with navigation.

- Curated and preprocessed a custom dataset of 5,000+ street scene images, then trained and evaluated multiple YOLO (v8, v9, v11) models, selecting the best-performing model (mAP@0.5: 0.85) for deployment.
- Deployed the optimized YOLO model via Hugging Face and integrated it into a cross-platform React Native frontend, achieving inference times under 200ms on mid-range mobile devices.

Fish Species Classification Using Self-Supervised Learning **Python, PyTorch, OpenCV, Scikit-learn**

- Researched and implemented a contrastive self-supervised learning model (SimCLR,MOCO,BYOL) to classify fish species from underwater images with limited labeled data.(1)
- The model achieved 99.62% classification accuracy on a test set of 50,000 images, outperforming a supervised baseline trained on the same labeled subset by 11%.
- **Published** findings as a conference paper at the IEEE International Conference on Computer and Information Technology (ICCIT), 2025.

TrevioIT Corporate Website **Next.js, Vercel, JavaScript, Tailwind CSS**

- Designed and developed a fully responsive, high-performance corporate website (trevioit.com) from scratch.
- Implemented dynamic content rendering, optimized image delivery, and leveraged Vercel's edge network to achieve a Lighthouse performance score of 95+ and a 40% improvement in Core Web Vitals.
- The site serves as the primary client acquisition channel, generating an average of 15 qualified leads per month.

Event Management Portal (Eventisa) **Laravel, MariaDB, JavaScript, CSS, Hostinger**

- Built a full-featured event management web application (eventisa.com) with user authentication, event creation, ticketing, and payment integration.
- Developed a robust backend using Laravel Eloquent ORM with a normalized MariaDB database, efficiently handling transactions for 500+ simulated concurrent users.
- Created a custom admin dashboard that reduced the time for event organizers to manage listings and reports by approximately 50%.

Technical Skills

- **Programming Languages:** Python, JavaScript, Java, PHP, SQL, C++.
- **Web Development:** Next.js, React.js, React Native, Node.js, Laravel, HTML5, CSS3, RESTful APIs.
- **ML/AI & Data Science:** Deep Learning (YOLO, CNN), Self-Supervised Learning, PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, OpenCV, Model Deployment.
- **Databases & Tools:** MariaDB, MySQL, Git, GitHub, VS Code, Hugging Face, Vercel, Expo.
- **Research & Soft Skills:** Academic Writing, Cross-functional Collaboration, Agile/Scrum, Client Presentation, Problem-Solving.

Achievements & Awards

- **Published Author, IEEE ICCIT (2025):** Authored and presented a conference paper on self-supervised learning for fish species classification.
- **Medha Lalon Scholarship (2025):** Awarded BDT 45,000 for three consecutive semesters for academic excellence (top 5%).
- **Runner-up, Treasure Hunt 2.0 (2023):** Secured 2nd place in a university-wide competitive event.
- **Merit Scholarship (2022):** Awarded a 50% tuition scholarship at East West University based on outstanding academic record.

Leadership & Activities

- **General Secretary,** East West University Science Club **2024 – Present**
  Organized 3 technical workshops (Python, Data Science, Web Dev) that increased active membership by 40%.

Languages

- **Bangla:** Native Proficiency
- **English:** Professional Working Proficiency (Fluent)
